ThinkPad T490 HealthCare Edition Intel Core I5-8365U
Model: 20Q90008US

Performance Meets Patient Safety

- 14" Healthcare industry laptop
- Powerful Intel® Core™ processing
- Thin & light and portable
- Antimicrobial Surface
- Quick Clean software
- Facial Recognition IR Camera for remote and e-consulting
- FIPS-201 Compliant Fingerprint Reader
- RFID/NFC secure-tap logon
- Rapid charge battery
- Great for Healthcare, Finance, Banking and Manufacturing

Features
Impressive Performance

The ThinkPad T490 Secure Access / Healthcare Edition can power through demanding tasks you have easily with up to 8th Generation Intel® Core™ vPro™ i5 processors. The DDR4 memory coupled with PCIe SSD storage offers an amazingly responsive performance, taking productivity to a whole new level.

Tested for battle, built for life

Like all ThinkPad laptops, the ThinkPad T490 Secure Access / Healthcare Edition is tested against 12 military-grade requirements and more than 200 quality checks to ensure it runs in extreme conditions. From the Arctic wilderness to desert dust storms, from zero gravity to spills and drops, you can trust this laptop to handle whatever life throws your way.

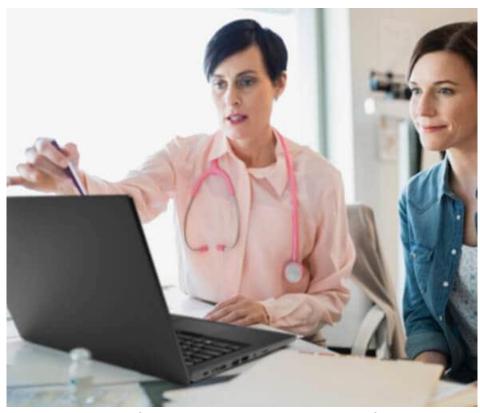

Go from 0 to 80 in 60

The ThinkPad T490 Secure Access / Healthcare Edition delivers up to 16 hours* of battery life with the low-power FHD display. If you're running on empty, Rapid Charge provides an 80% charge in just an hour. So, a 60 minute lunch break or a layover is enough to boost your battery up to 12 hours. What more could you need for life on-the-go?

Based on testing with MobileMark 2014 on the low-power FHD display panel. Battery life varies significantly with settings, usage, and other factors. Note that Rapid Charge requires the 65W power adapter

Lightweight & purposeful Design

Weighing just 1.46kg/3.23lbs, the ThinkPad T490 Secure Access / Healthcare Edition is ultralight and convenient so healthcare pros like you can carry it across patient wards. The intuitive touchscreen zoom in/out of medical images allows you to interact easily with applications.

Seamless security for healthcare professionals

Designed for use within a healthcare environment, the ThinkPad T490 Secure Access / Healthcare Edition laptop does practically everything but take the patient's temperature. A built-in RFID reader aligns computer access with facility access—certified by Imprivata® for compatibility with all major single sign-on providers. An FIPS 201-compliant fingerprint reader exceeds biometric security requirements for electronic prescriptions for controlled substances (EPCS), helping hospitals ensure a higher level of encryption and network security, while simplifying the workflow for clinicians.

A Strategy for Device Cleaning

The ThinkPad T490 Secure Access / Healthcare Edition laptop stands up to rigorous demands of continual healthcare cleaning and disinfection. Tested according to the CDC guidelines for cleaning, disinfecting, and sanitizing, the T490 Healthcare Edition, like all Lenovo ThinkPads, can withstand repeated daily cleaning without impact to performance or appearance. No need to turn the computer off when cleaning, this PC comes preloaded with the Lenovo Quick Clean software application, which suspends user input to facilitate thorough wipe-downs throughout the day. In addition, an ISO 22196-compliant antimicrobial surface treatment offers an additional layer of protection.

Multimedia Optimization

The ThinkPad T490 Secure Access / Healthcare Edition features a new narrower bezel design for a sleeker design and more productive workday. A Full-HD IPS display delivers high-resolution clarity for high-resolution viewing of medical imaging, lab results, shared clinical images etc., as well as enhancing battery life. In addition, experience exceptional conference calls with patients and co-workers thanks to Dolby® Audio™ Premium speakers, IR & 720p HD camera and dual far-field microphones.

Versatile Connectivity

Multitask effortlessly with an array of ports, including Thunderbolt™, USB Type-C, USB 3.1 Gen1, and HDMI 1.4 that provide easy connectivity to external medical displays and peripherals. Need, more, stay connected with the ThinkPad Pro Dock (sold seperately), a USB-C side mechanical docking station that easily connects with two male Type-C ports that slide into and automatically level your device. Once docked, your ThinkPad stays securely in place and connects to all of your peripherals such as monitors, keyboards, and mice.
